SUMMARY

A cloud engineer dedicated to solving complex infrastructure challenges. I specialize in leveraging **AWS, GCP, and Azure** to build scalable, high-performance systems, using Kubernetes and Terraform to automate processes and ensure maximum reliability.

PROFESSIONAL EXPERIENCE

Cloud Engineer <i>Searce Inc.</i>	Mar. 2024 – Present Hyderabad, India
- Architected and configured scalable API gateways using Apigee X across Dev, QA, and Prod, handling millions of requests via Cloud Run and GKE with low latency. - Engineered secure private API connectivity using Private Service Connect (PSC), Network Endpoint Groups (NEGs), and Service Attachments—enabling VPC-to-VPC integration without public IPs; secured using VPC firewall rules and VPC-SC. - Provisioned and maintained a scalable production environment with EC2 and Auto Scaling Groups, ensuring high availability and seamless performance for a high-traffic PHP/MySQL workload. - Implemented observability stack for 150+ instances using Prometheus, Grafana, Loki, AlertManager, combined with Slack, Gmail, and Freshworks for real-time alerting. - Deployed Fortinet HA/DR firewalls on AWS across 2 regions, enabling 99.99% uptime and achieving CIS compliance for internal audit readiness. - Led GenAI proof-of-concepts using Amazon Bedrock, Knowledge Bases, and Guardrails to enable secure and performant LLM deployments.	

SKILLS

Programming Languages: Python, JavaScript, C++
Cloud Platforms: AWS, Azure, GCP
IaC & Automation: Terraform, Jenkins, GitHub Actions, AWS CodePipeline/Commit/Build
Monitoring & Logging: Prometheus, Grafana, Loki, AlertManager, CloudWatch
Containerisation & Orchestration: Docker, Kubernetes
Web Development: HTML, CSS, React.js, Node.js, Express.js, TailwindCSS
Windows Server Admin: Active Directory, Certificates, Domains
Core Subjects: Data Structures and Algorithms, Cloud Computing, OOPs, DBMS, OS, Computer Networks, Software Engineering

PROJECTS

ContextCraft: AI-Powered Blog Writing Platform	May. 2025 – Present
- Built a full-stack web application using Next.js, React, and TypeScript that reduced blog creation time by 60% and increased user retention by 35%. - Integrated Gemini AI API for smart content generation, topic suggestions, and SEO optimization—improving content quality scores by 40%. - Implemented secure authentication using Google OAuth and Clerk with server-side validation, supporting 5,000+ user sessions. - Designed a responsive UI with Tailwind CSS, including a live markdown editor, SEO dashboard, and performance analytics with sub-300 ms load times.	
Seamless DataSync Deployment	Jan. 2025 – Apr. 2025
- Developed a user interface for AWS DataSync that simplified cloud migration setup by 60% through intuitive workflow design. - Automated cross-cloud data migration from Azure Blob Storage and Google Cloud Storage to Amazon S3, reducing configuration time by 70%. - Managed AWS DataSync agents, tasks, and locations to eliminate manual intervention and enhance operational efficiency by 70%. - Established robust error handling and monitoring systems to ensure reliable data transfers across multiple cloud platforms.	
Terraform Cross-Account Pipeline	Oct. 2024 – Nov. 2024
- Constructed a CI/CD pipeline using AWS CodePipeline, CodeCommit, and CodeBuild for infrastructure provisioning across multiple AWS accounts. - Optimized deployment time by 50% and cut manual configuration by 70% through streamlined workflows and remote state management. - Provisioned a fully automated AWS infrastructure with 5+ VPCs, NAT Gateways, Internet Gateways, and subnets, using modular Terraform; reduced infrastructure provisioning time by 60% and improved resource utilization. - Rolled out infrastructure for 10+ production workloads with testing and rollback, reducing setup time by 50%.	

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03)
Terraform Certified Associate (HCTAO-003)
AWS Certified Cloud Practitioner (CLF-02)

RECOGNITION

AWS Community Builder – DevTools AWS	
Recognized by AWS for contributions to cloud automation, DevOps, and infrastructure development using tools like CodePipeline, Terraform, and Kubernetes.	

EDUCATION

Bachelors in Technology, Computer Engineering <i>Charotar University of Science and Technology</i> CGPA: 8.5	Jul. 2020 – May. 2024
