Summary

Software Engineer (Python, FastAPI, React) specializing in AI-driven systems. Delivers significant efficiency gains by **accelerating development cycles** and **optimizing cloud environment setup**.

Experience

Searce Inc.

Hyderabad, India

Cloud Engineer

March 2024 - Present

- **Spearheaded** development of a full-stack product automation platform using **Python (FastAPI)** and **React**, **reducing feature delivery time by 70%** and cutting Helm chart setup from **2 weeks to 4 days**.
- **Architected** a low-code configuration system that enabled developers to auto-generate Kubernetes resources (Deployments, Services, Ingress) via a self-service UI, **accelerating release onboarding by 60%** and **eliminating manual YAML creation**.
- **Engineered** real-time monitoring dashboards and automated alert systems, **increasing developer visibility by 3x** while cutting **troubleshooting effort by 60%** via event-driven API integrations.
- **Designed and implemented** scalable backend APIs and background job schedulers for workflow orchestration and deployment automation, **handling 500+ concurrent executions with 99.9% reliability**.
- **Developed** an AI-powered knowledge automation module using **RAG pipelines** and **LangChain**, **boosting documentation retrieval accuracy by 40%** and **enabling contextual flashcard generation** for internal knowledge sharing.
- **Collaborated** cross-functionally with DevOps and cloud teams to deploy production-ready systems on **AWS and GCP** using **Docker** and **Kubernetes**, **cutting environment setup time by 50%** and ensuring **consistent multi-cloud reliability**.

Project

RAG Flashcards

August 2025 - August 2025

- Pioneered a full-stack AI search tool with a RAG pipeline to answer internal queries instantly, cutting manual document search by 90%.
- Engineered an AI-based flashcard generator that converted PDFs into interactive content, reducing onboarding time by 45%.
- Refactored the backend into modular Python + FastAPI, reducing debugging time by 50% and accelerating feature delivery.

Seamless DataSync Deployment

January 2025 - April 2025

- Designed a web UI for AWS DataSync that streamlined migration setup with guided workflows, improving setup efficiency by 60%.
- Automated cross-cloud data transfers from Azure Blob Storage and Google Cloud Storage to Amazon S3, reducing configuration effort by 70%.
- Integrated monitoring and error handling to maintain 99.9% success rates in continuous multi-cloud data transfers.

Terraform Cross-Account Pipeline

October 2024 - November 2024

- Forged a CI/CD pipeline using AWS CodePipeline, AWS CodeCommit, and AWS CodeBuild to provision infrastructure across multiple Amazon Web Services accounts.
- Optimized infrastructure provisioning by using modular Terraform and remote state management, reducing deployment time by 50% and manual steps by 70%.
- Deployed infrastructure with 5+ VPCs, NAT Gateways, and subnets for 10+ production workloads with testing and rollback.

Education

Bachelors in Technology, Computer Engineering

Gujarat

Charotar University of Science and Technology • 8.5

July 2020 - May 2024

Certifications

AWS Certified Solutions Architect - Associate (SAA-C03)

Terraform Certified Associate (HCTAO-003)

AWS Certified Cloud Practitioner (CLF-02)

Skills

Languages: Python, TypeScript, JavaScript, C++

Frameworks: FastAPI, Flask, React, Node.js, Express

AI/ML: LangChain, OpenAI API, RAG pipelines, Vector Databases

Databases: PostgreSQL, Supabase, MongoDB

DevOps: Docker, Kubernetes, GitHub Actions

Tools: Vite.js, Boto3, REST APIs, WebSockets, Prisma (basic)

Core Subjects: Data Structures and Algorithms, Cloud Computing, Operating Systems, Computer Networks, Database Management Systems, Software Engineering, Object-Oriented Programming, Computer Science
