Summary

Cloud Engineer (Python, FastAPI, React) specializing in AI-driven systems. Delivers significant efficiency gains by accelerating development cycles and optimizing cloud environment setup.

Experience

Searce Inc.	Hyderabad, India
<i>Cloud Engineer</i>	<i>March 2024 - Present</i>
- Architected and rolled out Private Service Connect infrastructure across two regions and four global QA environments, replacing legacy PSAarchitecture and reducing security vulnerabilities by 60% while enabling scalable API gateway operations. - Authored 10+ reusable Terraform modules for AWS and GCP services (EC2, IAM, KMS, RDS, Apigee X), cutting infrastructure provisioning time from 2weeks to 4 days and standardizing IaC practices organization-wide. - Established an enterprise-grade three-tier application architecture with auto-scaling, high availability, and multi-VPC connectivity via AWS TransitGateway using Terraform. - Enforced zero-trust security model using advanced firewall rules, SSL inspection, and integrated IDS/IPS to reduce unauthorized access risks withincloud environments. - Delivered a centralized observability platform using Prometheus, Grafana, Loki, and Alertmanager with Slack, Gmail, and Freshworks integrations,improving incident visibility and reducing MTTR by 45%. - Executed GenAI proof-of-concepts using Amazon Bedrock, Knowledge Bases, and Guardrails, validating secure LLM deployments and definingenterprise AI governance standards.	

Project

Monitoring Accelerator	September 2025 - Present
- Conceived a full-stack Kubernetes monitoring platform deploying Prometheus, Grafana, and Thanos across EKS clusters in under 10 minutes, reducingsetup effort by 90%. - Configured Thanos hub-and-spoke federation across multiple Kubernetes clusters, centralizing observability with S3-backed object storage forlong-term metric retention. - Created a comprehensive alerting framework with six rule categories (CPU, memory, disk, pod lifecycle, node health, scaling), integrated with SMTP,Slack, Teams, and webhooks.	
Containerisation Accelerator	August 2025 - November 2025
- Streamlined an end-to-end DevOps workflow from Excel configuration to Kubernetes deployment, reducing deployment time by 80% and eliminatingmanual creation of 150+ YAML files. - Engineered a high-throughput batch deployment engine capable of deploying 50+ microservices concurrently, supporting parallel Docker builds, ECRpushes, and Helm chart generation. - Created a Dockerfile generation service supporting multiple base images, custom build commands, and environment-specific settings with BuildKitand multi-arch (amd64/arm64) support.	
RAG Flashcards Generator	August 2025 - August 2025
- Developed a scalable, serverless backend using FastAPI with asynchronous I/O and modular services, deployed on AWS Lambda and API Gateway. - Engineered a complete Retrieval-Augmented Generation (RAG) pipeline, achieving sub-second semantic search by integrating AWS Textract, AmazonTitan embeddings (1024-dim), and OpenSearch kNN. - Incorporated Claude 3.5 Sonnet for generating context-aware flashcards, ensuring high factual accuracy through citation tracking and retrievalgrounding.	

Education

Bachelors in Technology, Computer Engineering	Gujarat
Charotar University of Science and Technology • 8.5	<i>July 2020 - May 2024</i>

Certifications

AWS Certified Solutions Architect - Associate (SAA-C03), Terraform Certified Associate (HCTAO-003), AWS Certified Cloud Practitioner (CLF-02)

Skills

Languages: Python, TypeScript, JavaScript, C++
Frameworks: FastAPI, Flask, React, Node.js, Express
AI/ML: RAG Pipelines, OpenAI API, Amazon Bedrock, Vector Databases, OpenSearch, Embeddings, Langchain
Databases: PostgreSQL, Supabase, MongoDB
Cloud & DevOps: AWS (Lambda, EC2, EKS, Bedrock), GCP, Terraform, Docker, Kubernetes, GitHub Actions
Tools: Vite.js, Boto3, REST APIs, WebSockets, Prisma (basic)
Core Subjects: Data Structures and Algorithms, Cloud Computing, Operating Systems, Computer Networks, Database Management Systems, Software Engineering, Object-Oriented Programming, Computer Science
